

DISPOSABLE ARTICLES WITH WETNESS INDICATOR

ABSTRACT

Absorbent articles that have wetness indicator graphics positioned thereon are disclosed, whereby the articles preferably include diapers, training pants, and adult incontinence products. The article includes a character graphic positioned in a waist region of the article, and a wetness indicator graphic that may be positioned in a crotch region. The character graphic is related to the wetness indicator graphic. The arrangement of the respective graphics preferably allow a caregiver to interact with a child to promote toilet training.
